When will these trees be removed? The removal will commence no sooner than 14 calendar days from the date of this notice.

How should I prepare? Property owners may want to consider removing desired plant material adjacent to parkway trees prior to removals, as adjacent plant material may be inadvertently damaged during the tree removal process. The City of Santa Monica will not replace plant material that is damaged as a result of the tree removal process.

Will the trees be replaced? Following the removal, parkway sites will be assessed for replanting. Please consult the "[Street Tree Designations](#)" list in the Urban Forest Master Plan to find out the designated replacement species for any street segment. If a replacement is approved, it will not take place on the same day as removal.

Can I prevent the trees from being removed? To appeal the removal of a tree, please complete the online tree removal appeal form available at santamonicatrees.com within 14 calendar days of the date of this notice. The appeal process is outlined on the appeal application found at the website listed above. You will be required to appear before the Urban Forest Task Force to discuss the appeal.

For questions or concerns regarding these tree removals, you may contact the Public Landscape Division at 310-458-8974 or public.landscape@santamonica.gov.
